23730211@ms.uit.edu.vn 0386771195 soul703

PROFESSIONAL SUMMARY

Motivated Backend Developer (Java) with strong foundations in OOP, Spring Boot, database design, and system architecture. Experienced in building real-time applications, implementing secure authentication with JWT, and applying Domain-Driven Design (DDD) and Event-Driven concepts in real-world projects. Seeking a Backend Engineer role to contribute to scalable, high-performance systems and grow in a professional engineering environment.

EDUCATION

University of Information Technology (UIT) 2020 – 2025
Bachelor of Information Technology

PROFESSIONAL EXPERIENCE

TMA Solutions 07/2025 – 11/2025
Java Backend Intern

PROJECTS

Quiz App 2025
Quiz App — Real-time Quiz & Exam Platform (2025)
Role: Backend Developer
Tech Stack: Java, Spring Boot, Spring Security, WebSockets, Redis, MySQL, JPA, Maven
GitHub: github.com/soul703/quizapp
Key Contributions:

- Designed a **multi-module DDD architecture** (Domain / Application / Infrastructure / Bootstrap) with clearly defined **port–adapter boundaries**, ensuring strict separation of concerns and high modularity.
- Implemented **event-driven workflows** using **Domain Events** combined with **Redis pub/sub**, integrating **projection handlers** to maintain consistent and query-optimized read models.
- Built **real-time quiz interaction features** over **WebSocket/STOMP**, supporting workflows such as join, start, next-question transitions, answer submission, live leaderboard updates, and final result aggregation.
- Implemented **JWT-based stateless authentication** with **role-based authorization** (TEACHER / STUDENT) and **WebSocket token validation**, ensuring secure bidirectional communication channels.
- Developed advanced **live-session capabilities**, including **automatic question-timeout scheduling**, session-state persistence, and **CSV-based leaderboard exporting** for post-session analysis.
- Designed a **PostgreSQL schema** utilizing **Flyway migrations**, **JSONB-based flexible data models**, and **targeted indexing strategies** to optimize both read and write performance under dynamic workloads.

TECHNICAL SKILLS

- **Programming Languages**
- **Java (strong)**, Go (basic)

Frameworks & Libraries

- Spring Boot, Spring Security, Spring Data JPA
- WebSockets, Lombok

Architecture & System Design

- Domain-Driven Design (DDD)
- Event-Driven Architecture
- Layered Architecture
- RESTful APIs, JWT Authentication
- CQRS (Lite)

Databases

- MySQL, PostgreSQL
- Redis (caching, token blacklist)

Tools & DevOps

- Git, GitHub Workflow
- Docker, Docker Compose
- Maven
- Unit Testing (JUnit, Mockito)
- Agile/Scrum

SOFT SKILLS

- Strong problem-solving
- Good analytical thinking
- Effective communication & teamwork
- Ability to read and understand technical documentation in English

LANGUAGES

English ● ○ ○ ○ ○

Intermediate Reading & Communication
