# NGUYỄN HỮU LỘC

**Backend Developer**

nguyenhuuloc.122004@gmail.com | https://github.com/nguyenloc2004

## SUMMARY

Final-year Software Engineering student with a strong foundation in Java and Spring Boot. Passionate about designing scalable backend systems. Seeking a Backend Developer Internship to apply system design skills to real-world projects and grow as a software engineer.

## TECHNICAL SKILLS

- Programming Languages: Java, Python
- Backend & Frameworks: Spring Boot, RESTful API, JWT Authentication
- Databases & Migration: MySQL, PostgreSQL, Liquibase
- Tools: Postman, Docker, Git
- Frontend: ReactJS, TanStack

## EDUCATION

Post and Telecommunications institute - PTIT

- Major : Information Technology, D22
- CPA : 3.2 / 4.0

## LANGUAGE

English: TOEIC 770

## PERSONAL PROJECT

**English learning platform** **May 2025 - Sep 2025**

- Description: A web platform designed to help users practice Vietnamese-to-English translation featuring AI-driven lesson generation and real-time intelligent feedback.
- Tech Stack: Java, Spring Boot, PostgreSQL, Redis, JPA/Hibernate, Liquibase, Google Gemini API, SSE.
- Backend & Security: Built core REST APIs with Spring Boot, PostgreSQL, and Redis; secured via JWT and OAuth2 Google login.
- System Optimization: Implemented Server-Sent Events (SSE) and async processing for real-time streaming, eliminating client polling overhead.
- AI Content Generation: Integrated Gemini API to dynamically generate customized lessons and vocabulary in structured JSON formats.
- AI Grading Engine: Engineered an automated evaluation system using Gemini to assess user translations and deliver instant, structured feedback.

**Sharing recipe** **Feb 2025 - Apr 2025**

- Description: A full-stack recipe sharing platform enabling users to discover, share, and review recipes with AI-powered content management and real-time collaboration features.
- Tech Stack: Node.js, Express, React, Firebase, Cloudinary, Context API.
- Backend Architecture: Developed RESTful APIs with Express and Node.js; integrated Firebase for real-time database and OAuth2 authentication; implemented JWT-based authorization across protected routes.
- File Management: Integrated Cloudinary for efficient image uploads and CDN delivery, enabling users to seamlessly share recipe photos.
